Superconductors & Functional Oxides

Como (Italy), 19-22 June 2012

The aim of SuperFOx-2012 conference is to address recent developments in the area of superconductivity and functional oxides, focussing on:

- Films, interfaces and low-dimensional systems;
- Nanostructured materials and devices;
- Magnetic oxides;
- Dielectrics, ferroelectrics and multiferroics;
- Superconductive materials and applications;
- Strongly correlated electron systems.

This conference is the merger of SATT (Conferenza Nazionale di Superconduttività) and FOxE (Congresso Nazionale sugli Ossidi Funzionali per l'Elettronica).

SuperFOx will provide a common forum for scientists from the fields of superconductivity and functional oxides, with prime focus on new ideas, concepts and applications.

The first edition (SuperFOx-2012) will be held at Polo Territoriale di Como del Politecnico di Milano.

Confirmed invited speakers:

- Bernd Büchner (IFW, Dresden)
- Josep Fontcuberta (ICMAB, Barcelona)
- Jochen Mannhart (Max Planck Institute, Stuttgart)
- Manfred Sigrist (ETH Zürich)

We look forward to seeing you in Como and to an exciting and enjoyable conference.
